

June 16, 2023, Press Conference

Founded in 2012 by two passionate aviators, Select Aviation College is a leader in airplane, seaplane and helicopter pilot training in Canada. Located at the Gatineau airport since 2020, the College is proud to be an economic builder in the region.

Select Aviation College offers the industry's highest quality and safety standards, with highly qualified instructors and a fleet of over 40 training aircraft and flight simulators. In addition, we offer an Attestation of College Studies (ACS) approved by the Quebec Ministry of Education and Higher Education (MEES). Our programs include all the training Transport Canada requires to obtain a commercial pilot's license, including the prestigious airline transport pilot license (ATPL).

In partnership with Desjardins, we offer financing solutions for Canadian students.

With our new state-of-the-art facilities, we're putting in place the elements to ensure the success of our students while keeping our eye on our mission to provide airlines with a new generation of industry-ready pilots.

Since its arrival, we've contributed to the regional economy in several ways.

IMPORTANT FACTS

240 students are enrolled for the 2022-2023 school year, representing an economic impact of over **\$8.6 million**.

85% of our students come from abroad and settle in the region for a period of two years or more, with some students staying on to work at the college.

80% of our students have jobs in the local area, helping to offset labour shortages experienced by local businesses.

56 full-time employees who live in the Gatineau area

With the increased traffic generated by the arrival of Select Aviation College at the Gatineau airport, a total of **\$13.1 million** was invested to build a new parallel taxiway and a new building adjacent to the terminal. Construction was completed in March 2023, and we began offering courses in April 2023.

An investment of **\$500K** was made to purchase of materials and equipment supplied by several Quebec companies.

Investment of **\$2.1 million** to purchase two new multi-engine

Generating a circular economy with the rejuvenation of several aircraft, like our investments of up to **\$100K** for a Cessna 150, purchasing its various parts in Canada. We currently operate 23 Cessna 150s.

Three high-tech ALSIM simulators for pilot training, worth a total of **\$920K**.

Transactions since 2021 resulting from the purchase, sale and brokerage of helicopters worth over **\$17 million**.

Community involvement and education with Aéro Gatineau event.

Collaboration with ID Gatineau, local businesses and airport-based companies.

A major contributor to the Gatineau airport's economy.
